

COVID data updates are typically posted on the Perry County Health Department website. However, we have recently seen a large increase in cases and believe awareness of the current status of our county is crucial to ensure citizens take extra precautions to prevent further spread.

Today, we are reporting the largest number of cases in a single day (45), and currently have the largest number of active cases (132) since the beginning of the pandemic.

We are urging you to do your part to stop the spread in our communities. Stay home if your are sick, stay 6 feet away from others. If you cannot stay 6 feet from others, wear a mask.

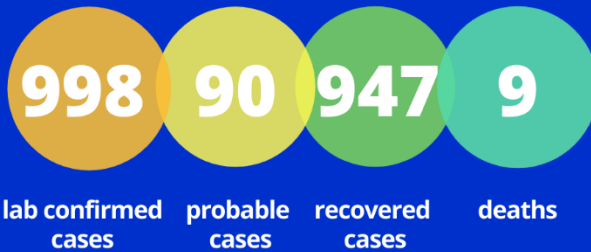

Please visit our website at <https://www.perrycountyhealth.com/newsDetail.php...> for COVID-19 updates on Mondays, Wednesdays, and Fridays.
