

All results have been received from the Perry County Community Testing event held on July 11th and 12th.

**602 Total Individuals Tested**  
**379 Perry County Residents Tested**

Of the 12 total positives from the event, 7 were Perry County residents. 2 of the 7 positive residents were current active cases and therefore were already included in our total case count before the event. The remaining 5 positive residents were reported with our Monday update.

Thank you to the [Missouri Department of Health and Senior Services](#) and the [Missouri National Guard](#) for making this event possible. An added thank you to Perry County Emergency Management and the [City of Perryville Government](#) on their role and support in making this event a success.

The Perry County Health Department only notified Perry County residents who tested positive. We have received many calls regarding results from individuals needing confirmation of negative results to provide to employers.

We do not have access to negative result documentation for specific individuals. Please call the Missouri Department of Health and Senior Service's hotline number at 877-435-8411 if you have any questions regarding your results.
